Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Tang et al (6228488). This reference discloses in col. 5, line 65 to col. 6, line 40 and col. 11, lines 1-30 a method of dying seat belts comprising woven polyester material containing PET-polycaprolactone diblock copolymer fiber comprising heat treating the belt under tension in an oven in the range of about 100 to 180 degrees C. It is the examiner's opinion that the claimed process is anticipated by the reference process.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tang et al for the same reasons as urged in the above paragraph. The limitations of these dependent claims are considered conventional and do not render these claims unobvious.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tang et al for the same reasons as urged in the above paragraph in view of Van Uden et al. The primary reference does not disclose washing, steaming, finish coating and drying the web. Van Uden et al discloses in col.3, lines 1-20 steaming, washing and drying the dyed web. It is the examiner's opinion that it would have been obvious to one having ordinary skill in this art at the time the invention was made to perform these steps on the web of the primary reference since these steps are conventional steps used in processing webs.
